

There is a lot at stake when carrying a mobile device, internet connected equipment, or anything that is wirelessly connected.

Silent Pocket makes a discrete and patented line of accessories that instantly block wireless signal. This eliminates your RF signature, location data, and blocks all in-and-outbound wireless communication. Thus securing your mobile devices from being hacked, tracked, or detected.

Enjoy our durable and patented Silent Pocket Faraday bags that are easy to adopt into daily carry at home or in the field.

TOP SELLING FARADAY PRODUCTS

Faraday Sleeves for Phones

A sleek, thin, and discrete sleeve that fits any smart phone. Made with weatherproof nylon or leather, this is our most popular and flagship product that serves a wide range of use cases. A great option for securing a device inside existing gear, but most importantly to secure your number one used device, your smart phone.

Faraday Sleeves for Laptops

Laptop security at it's finest. Externally apparent as a regular laptop sleeve, but with our internal patented Faraday cage that gives your laptop end point protection from being hacked, tracked, or detected in the field.

Waterproof Faraday DryBags

Our Waterproof Faraday Drybag collection ranges in sizes from 2.5 Liters to 20 Liter Duffel Bags. They serve as a one stop spot to quickly drop in multiple devices and secure them from the elements and wireless signal. The adoption of these products allows you to covertly carry connected devices such as phone, laptops, tablets without emitting signal in or out.

Utility Faraday Bags for Phones

For when the job needs to just get done. These are a no-nonsense Faraday Bag made with Durable Weatherproof Nylon to secure a device when you need to.

Custom Faraday Options

We have developed it all from large to small. Shown here is our latest US Military, in-plain-site, carry backpack that boosts a large Faraday cage compartment and discrete waterproof appearance. If you have a specific use case or need we can help solve your problem with one of our product solutions.
